New Reports

Access the most recent EPDC publication: *Windows to the Future 2025* to learn about projections of youth and adult education levels for 83 developing countries. [http://www.epdc.org/Analysis.aspx#Reports](http://www.epdc.org/Analysis.aspx#Reports)

Babette Wils' report *Windows on the Future 2025: Projections of Education Attainment and Its Impact* was just released in October. The report reveals that over the next 20 years, education levels of youth and adults will rise significantly in most developing countries, and education gender gaps will decline substantially. However, in a small group of countries trends are less positive -- population growth swamps education gains, and in others, education levels of youth and adults are projected to stagnate or reverse.

Check out the new EPDC Policy Brief Series to find out more about current issues in education. [http://www.epdc.org/Analysis.aspx#PolicyBriefs](http://www.epdc.org/Analysis.aspx#PolicyBriefs)

Five new policy briefs, based on *Educating the World’s Children* and *The Untapped Opportunity: How Public Private Partnerships Can Advance Education for All*, are now available online. Learn about strategies to improve retention, to reduce inequalities in attendance by targeting underserved populations, to increase resources for education by using public-private partnerships, and much more.

The paper includes an overview of what the different education projection models can be best used for; the structure of the models; the expertise, data, and software needed to run the models; and a comparison of projections using the different models.
